

ABOUT ME

As a Mechatronics Engineer with a solid grasp of full technology stacks, I'm eager to contribute to an organization's success while growing professionally. I'm especially interested in roles that allow me to apply my interdisciplinary skills, evolve into a Senior Full Stack Engineer, and drive meaningful innovation.

IDEOLOGY

Never stop learning.

¿WHAT CAN I OFFER TO A COMPANY?

Create solutions for any business problem.

SOFT SKILLS

- Leadership and decision making.
- Problem-solving, creativity.
- Communication, teamwork.
- Fast learning and self-taught person.
- Persistent and Patience.
- Work under pressure.

LANGUAGES

- **Spanish:** Native.
- **English:** Advanced

DANIEL CAAMAL HERRERA

Full Stack Developer

GENERAL SKILLS

- **NestJS, NextJS**
- **React, Angular**
- Django, FastAPI, Flask
- ASP.NET Core
- SQL (PostgreSQL, MySQL, SQL Server, SQLite)
- NoSQL (Mongo, Firebase)
- AWS Services (IAM, Redshift, S3, RDS)

GENERAL SKILLS

- Git (GitHub, Bitbucket, Jira), Gitflow
- Infrastructure: Linux, Nginx, Jenkins, Docker, Microservices, VPS
- Data layers, Clean Architecture, SOLID, DAOs, SOAs, GraphQL and Restful APIs, Data transporters NATS, HTTP, HTTPS, Errors, Unit Testing, DSA (Data Structure Algorithms).
- API Consumptions from OpenAI, Stripe, Webhooks. MCPs, N8N
- ORMs, Prisma, TypeORM, Sequelize, SQLAlchemy, Entity Framework
- Data visualization and monitoring. (Grafana, Loki, Helm)

EXPERIENCE

Sr. Full Stack JS at Nextia - Consultoría en Transformación Digital

May 2022 – Present

- Led the design, development, and maintenance of Infonavit's backend (Node.js) and frontend (React) systems, supporting Mexico's largest mortgage lender. Managed a high-dependency, high-concurrency environment for the platform **mi cuenta** (micuenta.infonavit.org.mx), ensuring seamless performance and reliability for millions of users.
 - Designed and implemented backend modules as microservices to enhance system infrastructure.
 - Built and maintained responsive frontend components using React, ensuring seamless user experiences.
 - Collaborated closely with UI/UX designers, product managers, and fellow developers to deliver scalable, robust solutions.
 - Conducted thorough code reviews, maintaining high standards of code quality, performance, and reliability.
- Develop and maintenance of Full Stack Solutions:
 - Developed an access control system for secure administration, leveraging advanced technologies to manage access to restricted areas (ASP.NET Core + React).
 - Built and maintained a project quality check manager system to ensure deliverables met or exceeded client expectations and defined standards. (NestJS + React). <https://mx-gpp.curriebrown.io/>
 - Developed a credit application platform with integrated KYC verification and payroll factory-based risk assessment, streamlining customer onboarding and credit evaluation processes. (NestJS + React Vite).

Semi Jr. Backend Python at Lynx

September 2021 – May 2022

- Develop and maintenance of the Gasomarshal Backend Volumetric Systems IoT (RESTful API, HTTP and database management) for SMARTGAS and other clients like G500, Gulf, FULLGAS and LAGAS.
 - Develop and maintenance of Flask and Django APIs modules.
 - Verify and maintenance of PostgreSQL and SQL Server databases.
 - Maintenance of the mobile applications with Flutter (Frontend developer).

Universidad Autónoma de Yucatán

November 2020 - June 2021:

- Participation in "Energy Efficient Framework for Sport Wearable AIoT Cardiac Arrhythmia Detection System" (2021) for the Journal **IEEE Transactions on Instrumentation & Measurement**.

EDUCATION

Udacity – Data Engineer Nanodegree

February 2024 – March 2024

Graduated by project and course finalization.

Learn to design data models, build data warehouses and data lakes, automate data pipelines, and work with massive datasets.

Universidad Autónoma de Yucatán – Mechatronic Engineer

August 2016 – June 2021

Graduated by thesis with an outstanding curricular trajectory average (94.80).
